Re: MS4 Storm Water Inspection
City of Jackson
Madison County
Permit No. TNS075361

Dear Mr. Scott,

The following is the City of Jackson's response to the TDEC inspection of our Stormwater Management Program. The inspection was performed by Jere Dougan, James Scott and Roger Orgain on June 27, 2014 and June 30, 2014.

The City of Jackson has fulfilled the NPDES requirement to develop and maintain a Stormwater Management Program to reduce the discharge of pollutants from the City of Jackson's MS4. All elements of the program are documented in the City of Jackson's Stormwater Management Plan (SWMP). During the inspection, JFO representatives identified specific areas in the SWMP that required updates and improvements, according to NPDES permit requirements.

The City of Jackson received a copy of the inspection report on July 28, 2014, that summarized permit requirements and identified areas the City of Jackson must address to come into compliance with those requirements. The City of Jackson will correct and improve items identified as a deficiency that we are able to correct and improve within the MS4 program year 2014-15.

If you have any further questions, please feel free to contact me at 731-425-8217.

Sincerely,

Wendy Braxter-Rhyne
Stormwater Program Manager

C: Jerry Gist, Mayor
